Easy warehouse management

Technologies

- JDK 8
- Maven
- Hibernate
- MariaDB
- JavaFX
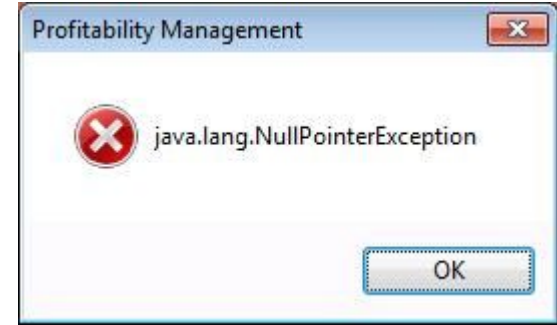

For testing:

- Jenkins
- TestFX
- JUnit 5

New requirements

- Localization
- Building computers from parts
- Adding information to products
- Searching
- Refactoring code
- User friendly layout

Problems

- Time with other courses
- Duplicate variable and method names
- Problems with git
    - Merging
- Check if text is used often before creating separate localization field for each of them
- Table associations

What we learned

- Hibernate
- Refactoring code
- Testing software
- Scheduling
- Megatons of code
